

DJ MEDICAL HAND TABLE

The DJ Medical Hand Table is designed for use in the operating room, outpatient surgery center, emergency room or doctor's office where surgical procedures are performed on the upper extremity. It is designed for convenient attachment to a wide variety of operating room tables as well as patient gurneys and patient exam tables.

The table top is made of graphite composite military grade lightweight material. It is easy to clean and maintain. The hand table slides under the mattress of any operating room table, gurney or exam table, and provides a stable platform on which to perform delicate procedures. It is easily adjustable in height to meet the requirements of the surgeon.

The DJ Medical Hand Table comes with a vinyl covered foam pad which provides for patient comfort and safety. Table top pads are replaceable and can be ordered from DJ Medical.
